

## ONLINE

teaching and training yOuNg students about the DigCompConsumers through cLIent-baSEd challanges and ICT

### Skills needed to shop online.

1

#### Research

- **Compare prices and read reviews** before making a purchase.
- With tight budgets and varying product quality, **finding the best deal** is essential.
- **Price comparison websites** like Google Shopping and review aggregators such as Trustpilot can help students make informed decisions.
- Considering factors like **shipping costs and return policies** ensures a satisfying shopping experience.

2

#### Security

**Protecting personal information is crucial.** Students should use **secure websites, trusted payment methods, and avoid public Wi-Fi networks.** Strong passwords and caution in sharing personal details are essential, along with monitoring bank statements for suspicious activity to prevent identity theft.

3

#### Budgeting

By **setting clear budget limits**, using budgeting tools, and prioritizing needs over wants, students can avoid overspending. **Comparing prices, looking for discounts, and avoiding impulsive purchases** help stretch the budget further. Sticking to a budget allows students to make smart online shopping decisions while keeping their finances in check.

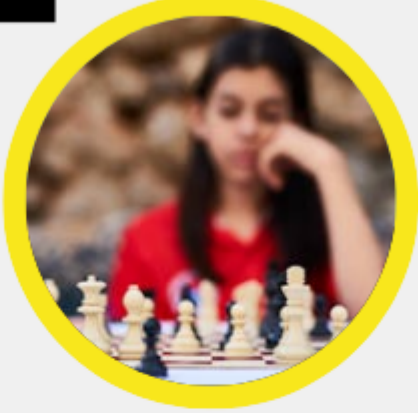

4

#### Patience

Anticipating varying delivery times, they should plan ahead and track packages. **Staying updated with shipping notifications ensures readiness to receive orders upon arrival.** By exercising patience and understanding the delivery process, students can navigate online shopping without stress.

5

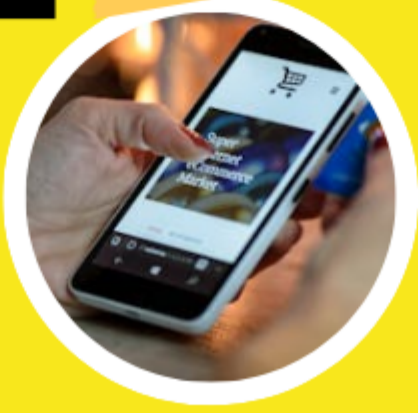

#### Decision

It's crucial to choose the best product by considering their **needs, preferences, and budget.** Thorough research, including reading reviews and comparing specifications, helps in making an informed decision. Additionally, comparing prices across different retailers ensures finding the best deal.

💡

#### Shop Smart

Online shopping requires research, security, budgeting, patience, and decision-making skills.
