Erasmus+ Project
ONLINE- teaching
and training young
students about the
DigCompConsumers
through client-based
challenges and ICT

The ONLINE consortium never stops! In recent months we have been working hard on the materials to be developed for our course; it has not been an easy journey but we are very satisfied with our product and look forward to sharing it with you! The platform that will host the material is almost ready and we are just waiting to test it... **but let's take a look at our last steps in detail.**

**WHAT'S
NEW?**

THE MEETING IN AVEIRO - 13TH OCTOBER

On 13 October 2023, we were hosted by our AEJE coordinator in Aveiro and took the opportunity not only to carry out work on our project, but also to socialise and take a tour around the school. It is always exciting to share these moments with members of the consortium, thus increasing cooperation and interpersonal relationships. During our meeting we mainly discussed the organisation and implementation of the Learning and Teaching activity in Sofia, concluded important activities and achieved the goals set for the first year of the project.

LTTA IN SOFIA - NOVEMBER 2023

15th to 17th Nov. ☺☺

From the 15th to the 17th of November, the Online Project Teams met in Sofia, for a very interesting and fruitful Learning and Teaching Activity, where the experts had the chance to present the contents of the training material developed in the first phase of the project. Our partner BNAAC hosted us in their premises and welcome us really kindly.

We had the chance to learn a lot in relation to evaluating and comparing Information on good and services, recognising and evaluating commercial communication and advertisement, managing payments and finances through digital means, managing personal data and privacy, sharing information with other digital consumers in the digital market place, asserting consumers rights in the digital market place.

-

But we are not satisfied yet! we are preparing for the second year of the project, the intensive work continues and we look forward to testing all our products with teachers and students and receiving their feedback. We are really very proud of the work done so far and also of our team, so stay tuned to our channels and don't miss any updates!
