Erasmus+ Project
ONLINE- teaching
and training young
students about the
DigCompConsumers
through client-based
challenges and ICT

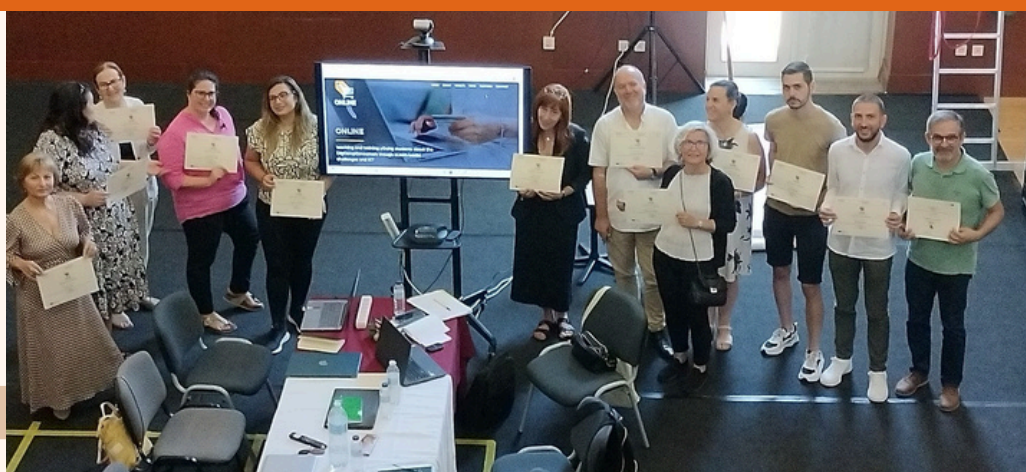

As we reach the conclusion of our exciting journey, we want to reflect on the incredible progress and milestones achieved throughout the project. The Erasmus+ ONLINE Project has been a transformative initiative, equipping both educators and students with essential digital competencies for navigating the ever-evolving online marketplace.

**The Final
Chapter
of the
ONLINE
Project**

THE FINAL MEETING IN AVEIRO - 19TH JULY

During the last partners' meeting, we revisited the singular goal of the ONLINE Project: to provide innovative learning opportunities for lower secondary school teachers, enabling them to reinforce their competencies and improve students' digital literacy. This final gathering was an important moment for reflection, as we discussed how the various project components—such as managing online financial operations, understanding digital marketing practices, and ensuring online safety—have empowered young learners with the skills needed to make informed choices in the digital world.

KEY ACHIEVEMENTS

Platform and Course Development

Over the course of these past months, we have successfully developed and refined a comprehensive learning platform filled with **educational resources designed specifically for teachers and students alike**. This platform is now accessible and filled with a wealth of materials that have been tested and refined, thanks to the collaborative effort of our partners.

One of the most exciting elements of the project has been the creation of a **dynamic community** where teachers, students, and experts collaborate. This environment, which promotes the co-creation of challenges, has proved essential in keeping our community engaged and responsive to the latest developments in digital education.

The Online Training Plan

Evaluating and Comparing Information on good and services

So...We launch of the ONLINE Academy

- Earlier this year, we proudly launched **the ONLINE Academy**, a hub of educational resources and innovative teaching modules aimed at fostering digital literacy. The **Academy has already become a vibrant space for educators** to access cutting-edge resources and share best practices for teaching digital skills to students.
